-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Response to Amendment*

Applicant's request for reconsideration under 37 CFR 1.116 of the rejection in the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

The rejection of claims 1-18 under 35 U.S.C. 102(a) as being anticipated by PCT Publication No. WO 98/16680 is withdrawn in view of applicants' arguments.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over PCT Publication No. WO 98/16680 (the publication, essentially for reasons of record).

The publication teaches a metal chelate forming fiber in which reactive functional groups are grafted onto a natural fiber or regenerated fiber. The grafting compound contains a glycidyl group in its molecule and the metal chelate forming compound can be ethylenediamine tetraacetic acid. See column 4. While not teaching the specific metal chelate compound of applicants, it is the examiner's position that the metal chelate compound of the prior art has a close structural similarity to the compounds contemplated by applicants and the expectation is that compounds similar in structure will have similar properties. *In re Payne*, 606, F.2d 303, 313, 203 USPQ 245, 254 (CCPA 1979) and *In re Dillon*, 919 F.2d 688, 16 USPQ2d 1897 (Fed. Cir. 1991).

Art Unit: 1774

Accordingly, the metal chelate compounds of the prior art would have rendered the metal chelate compounds of the present invention *prima facie* obvious, in the absence of factual evidence to the contrary.

***Response to Arguments***

Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

No claims are allowed.
